

Legal problems of using electronic signature in the field of public administration

The electronic signature one of the medium of renewing public services.

The electronic signature provides safe and authentic data exchange between absent clients.

Establishing e-governmental services, and the using of electronic signature in public field indicated some important legal and technical, infrastructural provisions:

- Regulating the document-managment system
- Defining additional recquirement of electronic signatures
- Establishing root CA in the public sector
- Defining the detalis of using electronic signature in official duty

The presentation will make an attempt to overview about the situation, the problems, and the eventual legislative answers
