

ABSTRACT:

NOVELTIES IN THE NEPTUN.NET UNIFIED EDUCATION SYSTEM

*Krisztina Oláh, olah.krisztina@sdakft.hu
SDA Stúdió Kft.*

In this presentation we would like to show the audience the novelties that are included in the new version of Neptun, the Neptun.Net and the way these new functions assist the life of the higher education institutions and make their operation more flexible, transparent and easy to handle. In this short summary we only have the chance to list those most important new functions, operational areas and other developments that we carried out and we will show the substance and the advantages of these during the presentation itself.

The new functions of Neptun.Net

- Modern, three-tier architecture
- Composite filters, and queries on every screen
- Complex rights management that can be personalized to the level of a database field or a menu point
- Possibility of using electronic signature
- Integrated, multiple schedule handling
- Complex schoolroom management
- Subject accreditation and equivalence handling
- Meta-based requirement editing
- Integrated opinion survey of students on teachers
- Integrated student card handling and production of the diploma supplements
- Automatic preparation of the institution's official supply of data (tax certificates, social security status, APEH 0608, etc.)
- Financial matrix that makes it possible to handle the institutions finances in connection with education according to its organizational structure.
- Optional ways of choosing the pay-in method (check, joint account, bank card, home banking). The methods can be combined according to the needs of the institution.
- Preparation of electronic bills.
- Integrated management of repayments
