

ABSTRACT:

INFORMATION TECHNOLOGY INFRASTRUCTURE DEVELOPMENT AT EKF

*Harsáczki András, harsaczki@ektf.hu
Kerecsendi András, kera@ektf.hu
Eszterházy Károly Főiskola*

In our talk, we would like to present the objectives, stages and results of the biggest IT infrastructure development at EKF so far. We will describe the initial state, which most higher education institutions are bound to face, and the problems, obstacles and solutions that have occurred during the development process. We will also talk about the implementation of the already established services under the new system as well as about new services launched during the development, which had not been used earlier at EKF.

At the end of the presentation, we would like to share with you our plans for further developments.
