

Consolidating servers and services at the KFKI Campus

*József Kadlecik, kadlec@sunserv.kfki.hu
KFKI Research Institute for Particle and Nuclear Physics*

We outline the migration of the central server machines to an uniform hardware platform. The cluster based, highly available and load-shared service park which has replaced the individual services will be shown. The cluster filesystem, which is at the heart of the services, and the uniform server configuration management system will be discussed in detail.
