NIIF AAI PROJECT

Kristóf Bajnok, bajnokk@niif.hu

AAI Project at NIIFI includes achievements of NIIF Directory and CA services and develops a new authentication and authorization middleware infrastructure. Goals are:
- transform NIIF Directory to a federated structure
- support deployments of organization level web-based Single Sign-on
- develop regulations, policies and best practices for and inter-institutional cooperation

This presentation describes infrastructure design and proposed services.
